VITIVIA

Pure Advanced Topical Antioxidants

■ Free radicals (sun, cigarette smoke, environmental factors) are harmful to the skin; they attack collagen, the skin's basic support structure, causing it to deteriorate prematurely.

VITIVIA Pure Advanced Topical Antioxidants neutralize and protect the skin from these harmful free radicals thus diminishing the appearance of fine lines and wrinkles, hyperpigmentation and photoaging, refines pores, minimizes inflammation, redness and soreness, maintains the presence of collagen revealing a more youthful looking skin.

Proven to enhance the overall condition of your skin, all products are uniquely designed to counteract the effects of sun damage, aging, and collagen loss. In addition, the products are dispensed as individual silicone capsules to lock in 100% pure concentrations of the vitamins. The silicone base also allows for an easy direct application.

Pro:Vitamin C10 contains pure vitamin C at 10%. It is made from L-ascorbic acid which neutralizes free radicals and effectively protects against environmental damage. Pro:Vitamin C10 is known to diminish the appearance of hyper pigmentation and photoaging.

Pro:Vitamin A15 specifically assists in regenerating skin cells and the presence of collagen, an important protein that aids in tissue firmness and strength. The result is healthier, more youthful looking skin.

Pro:Vitamin E5 specializes in rejuvenating the skin by offering a topical, protective layer of vitamin E along

with sunflower seed oil providing ideal absorption. It is highly protective against free radical damage and UVA radiation, major causes of skin deterioration and damage.

Vitivia was launched in February 2008.
